Decode Labs – Digital Marketing

Introduction

In this project, I learned the basics of SEO and keyword research. SEO helps a website appear in search engine results, while keyword research helps businesses understand what people are searching for online. For this project, I selected **Soulful Sweets Bakery** and researched keywords that can help the bakery reach more customers through search engines.

What is SEO?

SEO stands for **Search Engine Optimization**. It is the process of improving a website, so it appears higher in search results like Google. Better SEO can help a business attract more visitors and increase online visibility.

Benefits of SEO

- Increases website traffic
- Reaches the right audience
- Improves online visibility
- Builds customer trust
- Supports business growth

What is Keyword Research?

Keyword research means finding the words and phrases that people type into search engines when looking for a product or service.

For example, someone looking for a cake may search:

- Birthday cake
- Chocolate cake
- Bakery near me
- Cake delivery

Using these keywords helps businesses create content that matches what customers are searching for.
